

Ediz Tekok

Backend/DevOps Engineer

- @ ediztekok@gmail.com
- Stockholm, Sweden
- https://edizy.com
- https://linkedin.com/in/ediztekok
- https://github.com/ediz12

Skills

Programming

- Java
- Python
- SQL / NoSQL
- Shell Script (Bash)

Frameworks / Tools

- Java Spring Framework & Boot
- Python Flask/Quart
- Maven, Git
- MySQL, MongoDB, Hibernate
- JSF, Primefaces, Tomcat
- Nginx

Containerization & Orchestration

- Ansible
- RKE2 Kubernetes
- Helm Charts
- Docker, Docker Compose
- JFrog Artifactory
- Bamboo / Gitlab CI/CD

Other

- Agile SAFe method
- Microservices
- Rest API
- Linux (Ubuntu, CentOS, RHEL)

Working Experience

DevOps Engineer | IT Monitoring Team | Telia Company

09/2020 - present | Stockholm, Sweden

- Orchestrated installations/deployments of **Grafana, Cortex, Loki, Tempo, Cassandra, MinIO, nginx, and more** in Nordic/Baltic countries using **Ansible**
- Moved Dashboard as a Service (DaaS), a monitoring system used by 100+ internal teams/stakeholders consisting of Grafana product family from VM-only installation to **RKE2 Kubernetes** solution from scratch, considering **scalability, high availability, and site redundancy** using **Ansible, Helm, Artifactory, Jfrog**
- Developed Order Orchestrator, an application to automate requests from/to various teams using **Rest API in Java, Spring Framework**
- Developed simple webhooks that transform source data into the destination format using **Rest API in Python with Flask**

Software Engineer | Product Development Team | Testinium

03/2018 - 08/2020 | Istanbul, Turkey

- Developed the new QA Dashboard from scratch, an overall software quality monitoring platform to make the development process visible and increase productivity with **Java, Spring Framework, MongoDB, Docker, Microservices, Rest API, Bash scripts, Gitlab CI, Agile Development**
- Produced and maintained Central Device Farm Management System that currently holds 150+ devices with **Java, Spring Framework, JSF, PrimeFaces, Hibernate, Maven, MySQL, Tomcat and Rest API, using Bash scripts.**
- Created a tool that simplifies and reduces time spent by 55% for the installation process for the Operations Team on Testinium using the **above technologies** plus **ThymeLeaf** framework for frontend.

Software Student Assistant | Office of Distant Education

02/2017 - 03/2018 | Istanbul, Turkey

- Automated subtitle style editing with **Python** for online education systems
- Contributed to ItsLearning **SOAP API** with **Python** to generate automatic registration to class platforms for paid students.

Highlighted Relevant Experience

Community Application Development | Playmode

06/2021 - present | Remote support

- Developed an automated and manual moderating system for Riot Games Turkey's League of Legends, Wild Rift, VALORANT, Legends of Runeterra and LOLesports Discord servers, a community of over **150.000** users using **Python**
- Created a basic full stack OAuth2.0 client to connect Riot accounts to Discord with **Python with Quart** as backend and **AngularJS** as frontend

Education

2015 – 2019 **Software Engineering, BSc.** Bahçeşehir University – Istanbul, Turkey
2011 – 2015 **Science-Math** FMV Ayazağa Isik High School – Istanbul, Turkey

Awards & Certificates

2019	Team Member	Council of Europe - Strasbourg, France
2018	Organization Committee Member	IFHOHYP - Istanbul, Turkey
2015 - 2019	High honor student	Bahçeşehir University - Istanbul, Turkey
2015 - 2019	University Scholarship	Bahçeşehir University - Istanbul, Turkey

Other Volunteer Experiences

2019 - now	Chairperson of Member & Information Committee	IFHOHYP
2017 - 2018	Founding President, Accessible Life Club	Bahçeşehir University
2015 - 2017	Board Member, Esports Club	Bahçeşehir University
2011 - 2017	Online Moderator & Translator	Transformice
